NOTE: - Our team is available to answer your questions and provide guidance when needed.

SEONE

WHAT IS FOREX TRADER PROGRAM?

Forex trading is the process of buying and selling currencies on the foreign exchange market. It is one of the largest and most liquid financial market in the world, with an average daily trading volume of more than \$5 trillion. Forex trading is conducted 24 hours a day, five days a week, across major financial traders around the globe.

Traders use different strategies and techniques to try and maximize their profits. And we use technical analysis to identify trading opportunities based on historical price movements and trends. And we also use fundamental analysis to make trading decisions based on economic news and data releases. So, the program is structured in such a way that anyone who have zero knowledge about the stock market can learn and earn the consistent profit from the forex market after the completion of this course.

India's 1st academy will provide package of technical concept, trading strategies, research, market analysis, market psychology and the risk management. Academy also provides tools and resources to help traders, such as charting software, algo trading software and educational materials. To become an independent forex trader with the Seone Academy.

COURSE OUTCOME

TRADING KNOWLEDGE

Trading knowledge is the understanding of the market, the instruments traded, and the strategies used to make profitable trades. It includes knowledge of fundamental and technical analysis, risk management and trading psychology.

TRADING STRATEGIES

Set realistic goals: before you start trading, with different strategies this will help you to stay focused and motivated.

CONSISTENCY

You can look at the number of consecutive winning trades and the number of consecutive losing trades. Additionally, you can look at the average profit per trade over a period of time.

SELF-DEVELOPMENT

This includes setting goals, developing a trading plan, managing risk, and monitoring performance. It also involves developing a trading psychology and understanding the psychology of the market.

TRADING SUCCESS

It is typically measured by the amount of profits or losses made over a certain period of time. A successful trader will have a positive trading success count, while an unsuccessful trader will have a negative.
